Summary

The publication was prepared by the Austrian Central Statistical Office and published by the Austrian Government Press in 1986. The better to understand its purpose, it is necessary to give a definition of Ortschaft.

Originally an Ortschaft was a group of houses (a populated place) with common numbering. This system of numbering no longer exists because the numbers have been replaced by named streets with normal orientation numbers. The division of a commune into Ortschaften may be based only on tradition or other facts.

Still, in many cases, the Ortschaften have great importance for postal addresses. The publication facilitates the relating of postal addresses or names of the Ortschaften to the communes they belong to.

The grouping follows the alphabetic sequence of the approximately 17,400 names of the Ortschaften. Included are the federal province, the postcode of the municipal office, the name of the commune the Ortschaft belongs to and the codes of the communes applied by the Austrian Central Statistical Office. These codes are widely used in Austria because by means of them it is possible to find, for instance, the political district in which the commune is located.

The publication is out of print, but a new edition based on the population census of 1991 is in preparation, and will be published in the summer of 1992.

A specimen page of the publication is attached. Inquiries concerning it may be addressed to the secretariat of the Conference (Physical Infrastructure and Transport Branch).
